Secondary smoke alarm

To test if the smoke alarms were connected successfully, press the Test/Hush button of a random alarm until it beeps. When random beeps are also heard from other interconnected alarms, it means wireless connection has been made successfully.

Important Information: We recommend you do test or interconnection alarm every time you replace battery or re-install the alarm to make sure alarms in good working conditions.

7 **Important Information:**
1. Disconnect AC power before factory resetting.
2. During step 1-2, please don't release the test button.

Factory Resetting
①.Ensure that the power all is off and then press and hold the test button.
②.And then install the battery, the red LED will go on and soon go off within approx 3 seconds.
